

Role Of Urban Local Bodies In Urban Environment Management: Case Study Of Waste Management Of Patna.

Sneha Swarup

Local government is the form of government which is at the bottom of the pyramid of governmental institutes with the national government at the top of pyramid and intermediate government i.e state, region and province they are the one who stands for primary responsibilities like urban or rural infrastructure, land use planning and directly involving in the provision of basic water, sanitation and garbage disposal services etc.

Urban local bodies plays important role in urban environmental management since they are the best protectors of urban local environment. ULB are the ones who construct, operate and maintain economic, social and environmental infrastructure.
