

Value Orientation in Teacher Education: Need of the Hour

Dr. Manjul Gupta

A nation is built by its citizens, are moulded by teachers and teachers are made by teacher-educators. The National Policy on Education, 1986 has rightly stated, “no people can rise above the level of its teachers.” So for the development of the country, it is very important to have good teachers and good teachers can be produced only if we have a good system of teacher education and dedicated and efficient teacher-educators.
